3.6 样题

南京大学大学英语期末考试样卷

Directions: For this part, you are allowed 30 minutes to write an essay. You should start your

essay with **a brief description of the picture** and then express your views on **the importance of learning basic skills**. You should write at least 120 words but no more than 180 words. You may prepare your draft below but remember to write your essay on the Answer Sheet in black ink. (15%)

Part II Listening Comprehension (20 minutes)

Section A

Directions: In this section, you will hear TWO long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only ONCE. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on the **Answer Sheet** with a single line through the center. (8%)

Conversation One

Questions 1 to 4 are based on the conversation you have just heard.

1. A) It has a partnership with LCP. C) It specializes in safety from leaks.
B) It is headquartered in London. D) It has a chemical processing plant.
2. A) He is a chemist. C) He is a safety inspector.
B) He is a salesman. D) He is Mr. Grand's friend.
3. A) The public relations officer. C) Director of the safety department.
B) Mr. Grand's personal assistant. D) Head of the personnel department.
4. A) Wait for Mr. Grand to call back.
B) Leave a message for Mr. Grand.
C) Provide details of their products and services.
D) Send a comprehensive description of their work.

Conversation Two

Questions 5 to 8 are based on the conversation you have just heard.

5. A) Teacher. C) Editor.
B) Journalist. D) Typist.
6. A) Some newly discovered scenic spot.

- C) We must learn how to give gifts before going abroad.
- D) Reading extensively can make one a better gift-giver.

Passage Three

Questions 15 to 18 are based on the passage you have just heard.

- 15. A) She tenderly looked after her sick mother.
B) She developed a strong interest in finance.
C) She learned to write for financial newspapers.
D) She invested in stocks and shares on Wall Street.
- 16. A) She inherited a big fortune from her father.
B) She sold her restaurant with a substantial profit.
C) She got 7.5 million dollars from her ex-husband.
D) She made a wise investment in real estate.
- 17. A) She was dishonest in business dealings.
B) She frequently ill-treated her employees.
C) She abused animals including her pet dog.
D) She was extremely mean with her money.
- 18. A) She carried on her family's tradition.
B) She made huge donations to charities.
C) She built a hospital with her mother's money.
D) She made a big fortune from wise investments.

Part III Reading Comprehension (40 minutes)

Section A

Directions: *In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on the **Answer Sheet. (10%)***

Universities Branch Out

- [A] As never before in their long history, universities have become instruments of national competition as well as instruments of peace. They are the place of the scientific discoveries that move economies forward, and the primary means of educating the talent required to obtain and maintain competitive advantage. But at the same time, the opening of national borders to the flow of goods, services, information and especially people has made universities a powerful force for global integration, mutual understanding and geopolitical stability.
- [B] In response to the same forces that have driven the world economy, universities have become more self-consciously global: seeking students from around the world who

represent the entire range of cultures and values, sending their own students abroad to prepare them for global careers, offering courses of study that address the challenges of an interconnected world and *collaborative* (合作的) research programs to advance science for the benefit of all humanity.

- [C] Of the forces shaping higher education none is more sweeping than the movement across borders. Over the past three decades the number of students leaving home each year to study abroad has grown at an annual rate of 3.9 percent, from 800,000 in 1975 to 2.5 million in 2004. Most travel from one developed nation to another, but the flow from developing to developed countries is growing rapidly. The reverse flow, from developed to developing countries, is on the rise, too. Today foreign students earn 30 percent of the doctoral degrees awarded in the United States and 38 percent of those in the United Kingdom. And the number crossing borders for undergraduate study is growing as well, to 8 percent of the undergraduates at America's best institutions and 10 percent of all undergraduates in the U.K. In the United States, 20 percent of the newly hired professors in science and engineering are foreign-born, and in China many newly hired faculty members at the top research universities received their graduate education abroad.
- [D] Universities are also encouraging students to spend some of their undergraduate years in another country. In Europe, more than 140,000 students participate in the Erasmus program each year, taking courses for credit in one of 2,200 participating institutions across the continent. And in the United States, institutions are helping place students in summer *internships* (实习) abroad to prepare them for global careers. Yale and Harvard have led the way, offering every undergraduate at least one international study or internship opportunity – and providing the financial resources to make it possible.
- [E] Globalization is also reshaping the way research is done. One new trend involves sourcing portions of a research program to another country. Yale professor and Howard Hughes Medical Institute investigator Tian Xu directs a research center focused on the genetics of human disease at Shanghai's Fudan University, in collaboration with faculty colleagues from both schools. The Shanghai center has 95 employees and graduate students working in a 4,300-square-meter laboratory facility. Yale faculty, postdoctors and graduate students visit regularly and attend videoconference seminars with scientists from both campuses. The arrangement benefits both countries; Xu's Yale lab is more productive, thanks to the lower costs of conducting research in China, and Chinese graduate students, postdoctors and faculty get on-the-job training from a world-class scientist and his U.S. team.
- [F] As a result of its strength in science, the United States has consistently led the world in the commercialization of major new technologies, from the mainframe computer and the integrated circuit of the 1960s to the Internet *infrastructure* (基础设施) and applications software of the 1990s. The link between university-based science and industrial application is often indirect but sometimes highly visible: Silicon Valley was intentionally created by Stanford University, and Route 128 outside Boston has long housed companies spun off from MIT and Harvard. Around the world, governments have encouraged copying of this model, perhaps most successfully in Cambridge, England, where Microsoft and scores of other leading software and biotechnology companies have set up shop around the university.
- [G] For all its success, the United States remains deeply hesitant about sustaining the

research-university model. Most politicians recognize the link between investment in science and national economic strength, but support for research funding has been unsteady. The budget of the National Institutes of Health doubled between 1998 and 2003, but has risen more slowly than inflation since then. Support for the physical sciences and engineering barely kept pace with inflation during that same period. The attempt to make up lost ground is welcome, but the nation would be better served by steady, predictable increases in science funding at the rate of long-term GDP growth, which is on the order of inflation plus 3 percent per year.

- [H] American politicians have great difficulty recognizing that admitting more foreign students can greatly promote the national interest by increasing international understanding. Adjusted for inflation, public funding for international exchanges and foreign-language study is well below the levels of 40 years ago. In the wake of September 11, changes in the visa process caused a dramatic decline in the number of foreign students seeking admission to U.S. universities, and a corresponding surge in enrollments in Australia, Singapore and the U.K. Objections from American university and business leaders led to improvements in the process and a reversal of the decline, but the United States is still seen by many as unwelcoming to international students.
- [I] Most Americans recognize that universities contribute to the nation's well-being through their scientific research, but many fear that foreign students threaten American competitiveness by taking their knowledge and skills back home. They fail to grasp that welcoming foreign students to the United States has two important positive effects: first, the very best of them stay in the States and – like immigrants throughout history – strengthen the nation; and second, foreign students who study in the United States become ambassadors for many of its most *cherished* (珍视) values when they return home. Or at least they understand them better. In America as elsewhere, few instruments of foreign policy are as effective in promoting peace and stability as welcoming international university students.

Identify the paragraph from which the information in the statement is derived:

19. American universities prepare their undergraduates for global careers by giving them chances for international study or internship.
20. Since the mid-1970s, the enrollment of overseas students has increased at an annual rate of 3.9 percent.
21. The enrollment of international students will have a positive impact on America rather than threaten its competitiveness.
22. The way research is carried out in universities has changed as a result of globalization.
23. Of the newly hired professors in science and engineering in the United States, twenty percent come from foreign countries.
24. The number of foreign students applying to U.S. universities decreased sharply after September 11 due to changes in the visa process.
25. The U.S. federal funding for research has been unsteady for years.
26. Around the world, governments encourage the model of linking university-based science and industrial application.
27. Present-day universities have become a powerful force for global integration.
28. When foreign students leave America, they will bring American values back to their home

countries.

Section B

Directions: *There are TWO passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on the Answer Sheet with a single line through the center. (20%)*

Passage One

Questions 29 to 33 are based on the following passage.

Global warming is causing more than 300,000 deaths and about \$125 billion in economic losses each year, according to a report by the Global Humanitarian Forum, an organization led by Kofi Annan, the former United Nations secretary general.

The report, to be released Friday, analyzed data and existing studies of health, disaster, population and economic trends. It found that human-influenced climate change was raising the global death rates from illnesses including *malnutrition* (营养不良) and heat-related health problems.

But even before its release, the report drew criticism from some experts on climate and risk, who questioned its methods and conclusions.

Along with the deaths, the report said that the lives of 325 million people, primarily in poor countries, were being seriously affected by climate change. It projected that the number would double by 2030.

Roger Pielke Jr., a political scientist at the University of Colorado, Boulder, who studies disaster trends, said the Forum's report was "a methodological embarrassment" because there was no way to distinguish deaths or economic losses related to human-driven global warming amid the much larger losses resulting from the growth in populations and economic development in *vulnerable* (易受伤害的) regions. Dr. Pielke said that "climate change is an important problem requiring our utmost attention." But the report, he said, "will harm the cause for action on both climate change and disasters because it is so deeply *flawed* (有瑕疵的)."

However, Soren Andreasen, a social scientist at Dalberg Global Development Partners who supervised the writing of the report, defended it, saying that it was clear that the numbers were rough estimates. He said the report was aimed at world leaders, who will meet in Copenhagen in December to negotiate a new international climate treaty.

In a press release describing the report, Mr. Annan stressed the need for the negotiations to focus on increasing the flow of money from rich to poor regions to help reduce their vulnerability to climate hazards while still curbing the emissions of the heat-trapping gases. More than 90% of the human and economic losses from climate change are occurring in poor countries, according to the report.

29. What is the finding of the Global Humanitarian Forum?

- A) Rates of death from illnesses have risen due to global warming.
- B) Global temperatures affect the rate of economic development.
- C) Malnutrition has caused serious health problems in poor countries.

D) Economic trends have to do with population and natural disasters.

30. What do we learn about the Forum's report from the passage?

- A) It caused a big stir in developing countries.
- B) It was warmly received by environmentalists.
- C) It aroused a lot of interest in the scientific circles.
- D) It was challenged by some climate and risk experts.

31. What does Dr. Pielke say about the Forum's report?

- A) Its statistics look embarrassing.
- B) It deserves our closest attention.
- C) It is invalid in terms of methodology.
- D) Its conclusion is purposely exaggerated.

32. What is Soren Andreasen's view of the report?

- A) Its conclusions are based on carefully collected data.
- B) It is vulnerable to criticism if the statistics are closely examined.
- C) It will give rise to heated discussions at the Copenhagen conference.
- D) Its rough estimates are meant to draw the attention of world leaders.

33. What does Kofi Annan say should be the focus of the Copenhagen conference?

- A) How human and economic losses from climate change can be reduced.
- B) How rich countries can better help poor regions reduce climate hazards.
- C) How emissions of heat-trapping gases can be reduced on a global scale.
- D) How rich and poor regions can share responsibility in curbing global warming.

Passage Two

Questions 34 to 38 are based on the following passage.

It's an annual argument. Do we or do we not go on holiday? My partner says no because the boiler could go, or the roof fall off, and we have no savings to save us. I say you only live once and we work hard and what's the point if you can't go on holiday. The joy of a recession means no argument next year – we just won't go.

Since money is known to be one of the things most likely to bring a relationship to its knees, we should be grateful. For many families the recession means more than not booking a holiday. A YouGov poll of 2,000 people found 22% said they were arguing more with their partners because of concerns about money. What's less clear is whether divorce and separation rates rise in a recession – financial pressures mean couples argue more but make splitting up less affordable. A recent research shows arguments about money were especially damaging to couples. Disputes were characterized by intense *verbal* (言语上的) aggression, tended to be repeated and not resolved, and made men, more than women, extremely angry.

Kim Stephenson, an occupational psychologist, believes money is such a big deal because of what it symbolizes, which may be different things to men and women. "People can say the same things about money but have different ideas of what it's for," he explains. "They'll say it's to save, to spend, for security, for freedom, to show someone you love them." He says men are

more likely to see money as a way of buying status and of showing their parents that they've achieved something.

"The biggest problem is that couples assume each other knows what's going on with their finances, but they don't. There seems to be more of a *taboo* (禁忌) about talking about money than about death. But you both need to know what you're doing, who's paying what into the joint account and how much you keep separately. In a healthy relationship, you don't have to agree about money, but you have to talk about it."

34. What does the author say about vacationing?

- A) People enjoy it all the more during a recession.
- B) Few people can afford it without working hard.
- C) It is the chief cause of family disputes.
- D) It makes all the hard work worthwhile.

35. What does the author mean by saying "money is known ... to bring a relationship to its knees" (Lines 1-2, Para. 2)?

- A) Money is considered to be the root of all evils.
- B) Disputes over money may ruin a relationship.
- C) Few people can resist the temptation of money.
- D) Some people sacrifice their dignity for money.

36. The YouGov poll of 2,000 people indicates that in a recession _____.

- A) couples show more concern for each other
- B) it is more expensive for couples to split up
- C) conflicts between couples tend to rise
- D) divorce and separation rates increase

37. What does Kim Stephenson believe?

- A) Men and women view money in different ways.
- B) Money is often a symbol of a person's status.
- C) Men and women spend money on different things.
- D) Money means a great deal to both men and women.

38. The author suggests at the end of the passage that couples should _____.

- A) put their money together instead of keeping it separately
- B) discuss money matters to maintain a healthy relationship
- C) make efforts to reach agreement on their family budgets
- D) avoid arguing about money matters to remain romantic

Part IV Vocabulary (30 minutes)

Section A

Directions: *In this section, there is a passage with 15 blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is*

identified by a letter. Please mark the corresponding letter for each item on the **Answer Sheet** with a single line through the center. You may not use any of the words in the bank more than once. (15%)

In general, people around the world are eating better and living longer, but they are also moving less. This is (39) _____ to the rise of *diabetes* (糖尿病), a condition that (40) _____ 422 million people and is fast becoming a major problem, especially in poor countries. Two (41) _____ are critical for the successful treatment of diabetes patients. First is a correct diagnosis of the type of the disease, and second is the administration of the (42) _____ drugs.

A misdiagnosis and, (43) _____, the wrong treatment can cause many problems. “If you (44) _____ someone who actually has type 2 diabetes as type 1, they’ll be left on *insulin* (胰岛素) for the rest of their life when they don’t need it,” said Dr. Richard Oram of the U.K. National Institute for Health Research. “Even worse, if someone with type 1 diabetes is mislabeled as having type 2 diabetes, then they may not be treated with the insulin they need, and they may suffer life-threatening complications.”

A new, less expensive test, developed at the University of Exeter Medical School, measures 30 genetic (45) _____ in the patient’s DNA and calculates the risk for type 1 or type 2. (46) _____ diagnoses can be completed with a commonly used test for antibodies. Scientists are now trying to develop an even simpler DNA-based test that could be done with a smartphone app. In the meantime, (47) _____ in South Korea are developing a *nanotechnology-based* (基于纳米技术的) adhesive strip that takes away pain and (48) _____ of daily injections for diabetes patients. “The device is a patch type that (49) _____ [diabetics] to monitor blood sugar levels (50) _____ sweat without taking blood samples and injections, as well as to control *glucose* (葡萄糖) levels by injecting medication,” said Kim Dae-hyeong, a professor in the School of Chemical and Biological Engineering at Seoul National University.

The patch is studded with micro needles that painlessly enter *subcutaneous* (皮下的) tissue. When the connected chip senses that the level of glucose has risen above (51) _____, a small heating element dissolves medication and (52) _____ it into the bloodstream. Tests done on lab mice were promising, so scientists hope they will soon start testing the patch on humans. In this (53) _____, experiments are still expensive, but scientists say the price will drop once the patch is ready for mass production.

A) appropriate	K) stress
B) Variation	L) factors
C) phase	M) finally
D) researchers	N) affects
E) period	O) elements
F) releases	P) label
G) normal	Q) via
H) enables	R) consequently
I) reinforces	S) Individual
J) contributing	T) variants

Section B

Directions: There are 12 incomplete sentences in this part. For each sentence there are four choices marked A), B), C) and D). Choose the ONE that best completes the sentence. Then mark the corresponding letter on the **Answer Sheet** with a single line through the center. (12%)

54. As we can no longer wait for the delivery of our order, we have to _____ it.
A) postpone
B) refuse
C) delay
D) cancel
55. Young people are not _____ to stand and look at works of art; they want art they can participate in.
A) conservative
B) content
C) confident
D) generous
56. Most broadcasters maintain that TV has been unfairly criticized and argue that the power of the medium is _____.
A) granted
B) implied
C) exaggerated
D) remedied
57. The clothes a person wears may express his _____ or social position.
A) curiosity
B) status
C) determination
D) significance
58. By law, when one makes a large purchase, he should have _____ opportunity to change his mind.
A) accurate
B) urgent
C) excessive
D) adequate
59. Without proper lessons, you could _____ a lot of bad habits when playing the piano.
A) keep up
B) pick up
C) draw up
D) catch up
60. In order to show his boss what a careful worker he was, he took _____ trouble over the figures.
A) extensive
B) spare
C) extra
D) supreme
61. Everybody _____ in the hall where they were welcomed by the secretary.
A) assembled
B) accumulated
C) piled
D) joined
62. For many patients, institutional care is the most _____ and beneficial form of care.
A) pertinent
B) appropriate
C) acute
D) persistent

63. In the _____ of the project not being a success, the investors stand to lose up to \$30 million.
- | | |
|----------|-----------|
| A) face | B) time |
| C) event | D) course |
